*This conference is hosted by the Water Environment Federation, in cooperation
with the Virginia Water Environment Association.*

Dear Colleagues,

Welcome to Virginia Beach! The Water Environment Federation in cooperation with the Virginia Water Environment Association are honored to have you join us for the WEF Innovations in Treatment Technology Conference (ITT). On their behalf, we enthusiastically invite you to participate in this exceptional opportunity for education and collaboration!

WEF is committed to providing learning and information transfer opportunities for our design, operations, and research communities. This conference focuses on the most innovative emerging technologies in greater detail. Therefore, this conference, presents a unique opportunity to share ideas, which is critical for the continued advancement, acceptance, and implementation of sustainable process strategies into practice and the identification of knowledge gaps and future needs in this crucial field.

The Opening General Session will feature keynotes by Thor Young on past drivers for technological advancement in the Chesapeake Bay area and by Art Umble on the wastewater utility of the future. Over the next several days there will be 27 sessions within the technical program featuring speakers from various backgrounds, including regulatory, research, design, implementation, and utility operations. These interactive sessions consist of 15-minute presentations, short technical briefings, and facilitated discussions. Some of the session topics include:

- Process fundamentals and modeling
- Nutrient removal and recovery
- Sedimentation and separation processes
- Water reuse
- Balancing and optimizing carbon management
- Enhancing secondary treatment, including densification, ballasted processes, and membranes
- Contaminants of emerging concern and associated treatment means
- Process aeration and mixing systems
- Digestion

We would like to bring your attention to two special sessions: A session organized by Young Professionals (YPs) where both experienced professionals and YPs will have a chance to exchange ideas on careers and the future of our industry, and Journey into Innovative Practices which will feature perspectives from consulting, academia, government, and utilities on bringing innovation into practice.

This conference also features several pre-conference workshops for those who are able to participate on Tuesday:

- *On Sedimentation* featuring live settling demonstrations (full day)
- *Biofarming: A New Approach to Wastewater Process Intensification* (full day)
- *Exploring the Application and Interpretation of 'omics Data in Biological Nutrient Removal (BNR)* (half day)
- *Evolution of Treatment Process Optimization Utilizing Advanced Data Analytics and Machine Learning* (half day)

These pre-conference workshops are always popular and well attended, offering fantastic opportunities to meet your peers and hear current ideas for tackling the issues we face as an industry in the most interactive and hands-on setting we offer.

We encourage you to network with fellow attendees and presenters throughout the conference, sharing your experiences and learning from one another. Facilitated discussions have been incorporated into each session to promote collaboration and idea exchange. In addition, please be sure to join us for the networking reception on Wednesday evening to continue the conversation from the day's technical sessions.

We hope you enjoy this informative event and have many productive interactions.

Sincerely,

2024 ITT Conference Co-Chairs

CONTINUING EDUCATION

Continuing Education credit files will be made available online after the conference.

Participating attendees will receive an email within 4 weeks after each event informing them when CE Credit documentation becomes available. Attendees will be able to view and download a certificate and transcript detailing their event participation using the link provided in the event follow up messaging. These details are also posted under the Events & Education tab of www.WEF.org.

How Do I Receive Credit For this Conference?

In order to receive credit for participation in any of the event sessions attendees will be required to properly fill out and track session times using the CE Credit Request Form. This requires obtaining a room monitor or WEF staff member initial for each session which you'd like to claim CE credit hours. These forms will be made available at the registration counter. Credits obtained during this event will be available after the conference using the link provided above. Please ask a WEF staff member if you have any questions or if you need to locate a CE Credit Request Form.

Pre-Conference Workshops:

WEF offers Continuing Education Units (CEUs) for participation in workshops. One CEU is the equivalent to 10 hours of training or formal instruction. These are distributed for structured, relevant professional training above and beyond that of initial certification or employment in a particular field.

Technical Sessions:

WEF offers Professional Development Hours (PDHs) for participation in technical sessions. A PDH is defined as one hour spent engaged in an activity that contributes to the advancement or enhancement of professional skills or scientific knowledge of a professional engineer or operator.

When Will I Receive Credits For this Conference?

Certificates and transcripts are available for download after each event. WEF will send an email after the conference to inform attendees where they can obtain their credits. Please keep in mind that most state licensing boards require the individual licensees to report continuing education credits.

Note: Educational Credits will not be recorded, and documentation will not be distributed unless the attendee is a confirmed registrant of this event and the proper steps are completed as indicated in the directions provided here and on the CE Request Forms.

CONTINUING EDUCATION

Are WEF Continuing Education Credits Approved in My State?

Most state engineering boards will accept WEF event credits as issued by WEF. WEF applies for approval in many states for operators and will be happy to work with individuals and Member Associations for additional state or agency approvals upon request. In addition, WEF has been approved as a Training Provider through the following: The Florida Board of Professional Engineers, the New York State Department of Education, and the Ohio EPA.

Please visit www.wef.org for specific state approval information for each event.

What Else Do I Need to Know?

WEF follows the International Association of Continuing Education and Training (IACET) guidelines along with strict state-specific CE Credit regulations. We strive to maintain these policies and procedures regarding our Continuing Education Program to meet with and receive state recognition of our events. WEF calculates education credits following a standardized method that is widely accepted by certification and licensing agencies. However, many states differ in the type and/or number of credits they will approve for educational events. Because of this, participants are responsible for exploring their state requirements and for ensuring that WEF conference credits are accepted.

Service and Support...

WEF maintains a database of all continuing education files for a minimum of 7 years. You may contact WEF's Customer Service Team between the hours of 8:30 a.m. and 5:00 p.m. EST, Monday through Friday for questions related to WEF Programs - 1-800-666-0206 or csc@wef.org.

State Credit Calculations:

Each state has its own set of CE credit requirements. Some licensing boards use different acronyms for approved training credits. In most instances the credits issued by WEF can be converted to meet state specific requirements that vary from the system used by WEF. This is usually managed at the state level using the following conversion:

1.0 CEU = 10 Hours of session time

1.0 PDH = 1 Hour of session time

1.0 General Contact Hour = 1 Hour of session time

For example: **1.7 CEU Credits = 17.0 PDH** depending on individual state regulations.

**CEU & PDH credits are available for Workshops to Professional Engineers licensed in the state of New York (NYSED).*

Please note: courses that are not related to professional practice, such as accounting/financial planning, basic Auto CAD, general office management, insurance, marketing, real estate, risk management, DE&I, etc. are not approved for continuing education credits by some state licensing boards, including the NYSED.

For more information regarding WEF's Continuing Education Program, please visit the Events & Education tab at www.WEF.org.
