

We need YOU to be a Water Advocate!

Aging infrastructure, strict requirements, and continued economic pressures have put unprecedented stress on local governments and agencies that provide essential water services.

Elected officials are being called upon to make tough choices that will impact water quality and the viability of our communities for generations to come.

We know there is a better path: A path that leads to public appreciation for the value of water, investment in our essential water infrastructure, and a better quality of life for our states and communities.

Water Professionals – speak up, share your knowledge. It is more important now than ever. Inform government decision-makers and the public about the importance of water.

We are the experts, let's speak with a loud, united voice.

The Water Advocates program will create a network of water professionals in every state, community, and every congressional district. We will encourage others to see the true value of water and steps to protect it. We will give you with the training and information you need to champion clean and safe water.

You will be able to help in specific ways including: letters to elected officials and media outlets, presentations to business and community organizations, and visits to legislative offices.

Water needs YOUR voice. Won't you sign up today?

Submit your information to wateradvocates@wef.org

Please include your: Name | Title | Address | E-mail | Phone

Once you sign up, you will be contacted with additional information about the Water Advocates program. Thank you!
