Urban Utilities
Innovation Centre

The Queensland Urban Utilities' Innovation Centre is housed in a heritage-listed building located at its Luggage Point Sewage Treatment Plant in Brisbane. Queensland Urban Utilities

Housed within the Innovation Centre is a 1.2-km network of sewer pipes that mimic the conditions of Queensland's sewerage network. This setup enables the utility's employees to take research into reality. Queensland Urban Utilities

Hundreds of visitors, both domestic and international, have come to the Innovation Centre to see Queensland Urban Utilities' groundbreaking work. These solutions will transform water networks across Australia and overseas. Queensland Urban Utilities
