

COLLECTION SYSTEMS AND STORMWATER CONFERENCE

EXHIBITOR CALL FOR CONTENT

Technology Spotlights have been offered at WEF Events for many years. These sessions bring attendees directly to exhibitor booths for topic-focused discussions allowing presenters to showcase products and services with equipment or hands-on visuals.

Requirements

Submissions should be from **confirmed** Collection Systems and Stormwater Conference exhibitors. Interested in exhibiting at CSSW 2026? Contact conferencesales@wef.org.

What is a technology spotlight presentation?

Technology spotlights are **15-minute presentations** taking place within exhibitor booths. These non-power point learning sessions provide hands-on experience between vendors, operators, and engineers. Presentations should not be sales pitches and should explain what does or does not work for the technologies presented. Examples include ideal application, size limitations, calculations, design life, tolerance of active infiltration, etc.

This call for exhibitors is not for late/post-deadline technical session abstract submissions. Such submissions will be rejected by the committee.

What is the submission process?

The call is open to any confirmed exhibitor able to address the conference subject matter and/or the topics provided below. Within the submission site, all submitters will be required to submit:

- **Abstract:** proposal including a description of the proposed presentation (9,000 character maximum)
- **Topic:** Identify the topic your presentation will cover (topic listing provided below)
- **Key Takeaway:** Short sentence describing one key takeaway attendees will learn from your presentation.

Topics

- AI & Intelligent/Smart Systems
- Climate Change Resilience and Tidal & Sea Level Rise Impact
- Community Engagement, Service Equity & Safety
- Design, Construction & Asset Management
- Funding & Financial Planning
- Green Infrastructure, Wetlands Restoration & Nature Based Solutions
- Integrated Planning, Regulatory & Programmatic Innovations
- Modeling
- Odors, Air Pollutants & Public Outreach
- Operators, Leading Operations, and Community Innovations
- Small Communities, Decentralized Systems and Management
- Trenchless Technologies & Gray Systems
- Wet Weather Control, Urban Flooding & Surface Water Management

How do I submit?

All technology spotlights must be submitted via the submission site. Emailed submissions will not be accepted. Submissions must be completed by **April 27th at 9AM Eastern.**
