RESIDUALS & TREATMENT BIOSOLIDS & TECHNOLOGY CONFERENCE

MAY 11-14, 2026

Kansas City Convention Center, Kansas City, Mo.

Sponsorship Prospectus

In 2025, two WEF specialty conferences, the Residuals and Biosolids Conference (RBC) and Innovations in Treatment Technology (ITT) Conference, were combined, with much success. This joint event provides opportunities for these technical communities to come together and work on some of the most pressing issues in the water industry focused on the circular water economy, while preserving the unique character of both programs and audiences. This event will share new technologies, successful innovations, and current best practices to allow industry professionals to achieve long-term success in both designing and managing biosolids programs and designing and operating water resource recovery facilities.

The conference will include oral presentations, interactive discussions, pre-conference workshops, exhibits, technology spotlights, and opportunities for networking in dynamic settings. Quality, in-depth presentations and ample networking time will provide an intensive three days for all 650+ participants.
